Our Findings

No.	Vulnerability	Severity
1	Cookie without security attributes	Low

Risk Assessment

Cookie without security attributes

Description

The website uses the cookie for sensitive operations, but the cookie is not marked with the HttpOnly flag, Secure flag and the Samesite flag.

Proof of Concept

The cookie attribute 'secure' was not configured securely.

Recommendations

It is recommended to enable the HttpOnly and Secure flag for the APP_SESSION cookie. It is also recommended to have Samesite attribute set as Lax or Strict.
